Select Two Nodes to Connect

- Node 1 Origami ☒ 404
- Node 2 Crystals ☐
- Node 3 Animated
Graphs ☐
- Node 4 Tensegrity
Sphere ☒ 406
- Node 5 Biomimicry ☐
- Node 6 3D maps ☐
- Node 7 Central Asian
profiles ☐
- Node 8 The Real Price
of Oil ☐
- Node 9 Oil Producing
Country Profiles ☐
- Node 10 Hydrogen,
Tomorrow's
Petroleum ☐
- Node 11 Entrepreneur
education ☐
- Node 13 Entrepreneur
education ☐
- Node 70 The Real Price
of Oil ☐
- Node 71 Earth Trends:
The Environm ☐
- Node 73 British Library
Ancient ☐

Comments on Node #1: "Origami"

Contributed by 'jmiller' on Apr 21, 2002
origami is kind of like tensegrity?

1008

You mean how tension holds them together?

New Note

1014

Contributed by 'jmiller' on May 4, 2002

see the website <http://www.physics.org> for a discussion that we might tap into

New Note

Topic	Notes on the Association Between Topics	Topic
<u>Origami</u> 1104	<div>1106</div> <div>Contributed by 'j'miller' on Apr 21, 2002 I think there's an analogy between origami and tensegrity. They both require balanced tension to hold them together.</div> <div><div>1116</div><div>1108</div><div>1110</div><div>1112</div></div> <div><div>1105</div><div>1105</div></div>	<u>Tensegrity</u> <u>Sphere</u> 1105
	<div>Contributed by 'demo' on Apr 23, 2002 What does that mean in the real world? Can tensegrity study be expanded to surfaces, like the surfaces of paper in origami, instead of just lines, like the strings used to build tensegrity spheres?</div> <div>1114</div>	
	<div>Contributed by 'j'miller' on May 4, 2002 I don't know, possibly. I'll contact Dr. Doe and get his reaction, perhaps invite him to this collaboration.</div>
